ANALYSIS OF THE PARTS OF THE INTERIM REPORT AS OF 30TH JUNE 2021 RELATED TO THE 6-MONTH DIVIDEND

Key financial indicators

The Management Board considers the possibility for the payment of the 6-month dividend is determined to the greatest extent by the following financial indicators of the Company as of 30th June 2021:

Financial indicator	Value	Note
Pre-tax profit	13,649	Total retained earnings as of 30 th June 2021

These financial indicators reveal that the Company generates a significant profit and is in a stable financial position, characterized by high liquidity and low indebtedness.

Review of the current assets and current liabilities

The parameters of the 6-month dividend (amount and payment period) depend to the most significant extent on the values of the current assets and current liabilities of the Company, which according to the Interim Report as of 30th June 2021 are as follows:

Thousand BGN

Current assets	30 th June 2021
Trade and other receivables from related parties	11,116

Information on the liabilities related to the possibility 6-month dividend to be paid

The payment of the 6-month dividend as a payment to shareholders at the expense of equity alone will not lead to indebtedness of the Company to third parties - creditors. Proposing the payment of the six-month dividend, the Management Board proceeds from the current indebtedness, specified in Art. 115 B, para. 2, p. 1 of POSA, namely to creditors, staff, budget and others, which are as follows:

Thousand BGN

Trade, tax and other liabilities	30th June 2021
Liabilities to related parties	28
Payables to suppliers and clients	38
Payables to the staff and under management agreements	125
Payables for unused paid leaves	31
Payables to social insurance institutions	22
Payables for income tax	28
Other tax liabilities	96
Total	368

The main parameters of these liabilities are:

- the trade liabilities are not interest-bearing and are usually settled within 30-60 days;
- the public obligations are settled within the legally established terms;
- the loan obligations are interest-bearing, being entirely to related parties and are settled at the respective maturity, provided in the loan agreement;
- the other liabilities are not interest-bearing and are usually settled at the respective maturity.

The reduction of current assets with the funds that will be distributed to shareholders upon payment of the 6-month dividend will not significantly change their ratio to the current liabilities neither will lead to delays or arrears in the payment of the current liabilities.

As of 30th June 2021 the Company has no liabilities under loans to related parties and third parties.

As of the date of preparation of the report the Company has no assumed and unpaid debts, the repayment term of which has expired before this proposal for a decision for distribution of a 6-month dividend.

Review of the net cash flows from operating, investing and financing activities

During the reporting period the net cash flow from investing activities amounts to BGN 2 510 thousand and is formed mainly by a partially received dividend from TBS EAD in June 2021 pursuant to Decision of 4th June 2021 of the Company in its capacity of sole owner of TBS EAD, which accepted the report of the subsidiary for 2020 and approved decision for distribution of dividends in the amount of BGN 11,442 thousand.

On 28th June 2021 the Company in its capacity of sole owner has accepted the reports for 2020 of all its other subsidiaries and has decided to distribute dividends as follows:

- from Komutel (Serbia) with an equivalent of BGN 391 thousand;
- from Telelink Bosnia and Herzegovina with an equivalent of BGN 782 thousand;
- from Telelink Slovenia with an equivalent of BGN 841 thousand.

As of 30th June 2021 the receivables of the Company from dividends amount to BGN 10 956 thousand after the partially paid dividend by TBS EAD in the amount of BGN 2,500 thousand.

In the first half of 2021 the Company has used and repaid in full financial resources based on a Loan Agreement with TBS EAD and as a result it reports a negative net cash flow from financing activities in the amount of BGN -1 130 thousand.

Even after the above payments the net proceeds from investment activities are sufficient to cover the negative net cash flow from operating activities in the amount of BGN -822 thousand, reflecting the natural operating loss and the negative changes in the net working capital for the period, as well as the significant increase in cash and cash equivalents by BGN 560 thousand.

Dividend receivables will ensure the payment of a 6-month dividend to the shareholders of Telelink Business Services Group AD, as well as the needs for funds for the operating activities of the Company.

Summary

Based on the six-month financial report as of 30th June 2021 the Management Board considers that the conditions under Art. 115 v, para. 2, p. 1 of the POSA for payment of a 6-month dividend have been met, namely:

- the available funds of the Company as of 30th June 2021 and expected to be available in the second half of 2021 are sufficient for the payment of the 6-month dividend; and
- the payment of the 6-month dividend does not jeopardize the current servicing of the Company's liabilities to creditors, staff, budget and others in the normal course of its activities.
