

# Electrohold ICT BULGARIA Penetration Testing

## Overview

**Electrohold ICT** is the legal successor of CEZ ICT Bulgaria EAD. The company provides numerous services in the field of information and communication technologies, which are systematized in a catalog and have guaranteed quality parameters and response times.

**INDUSTRY:** Technology

## Challenge

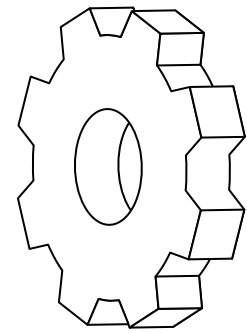

Electrohold ICT, following the company's goal to create, maintain and develop high-tech and reliable ICT solutions, has requested from Telelink Business Services **to provide series of penetration tests of their infrastructure and web applications** to identify vulnerabilities, which might be exploited by threat actors.

# Electrohold ICT BULGARIA

## Penetration Testing

### Solution

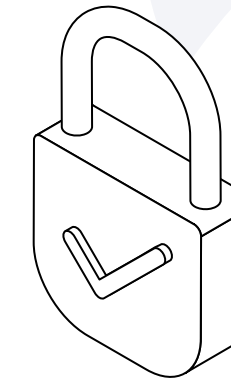

Telelink Business Services checked and evaluated the security posture of publicly accessible web systems of Electrohold ICT group companies, through **remote network access**, and **internal network access** of information systems in the scope.

Considering the OWASP and NIST SP 800-115, our certified and highly experienced testers conducted the security assessment of systems and applications.

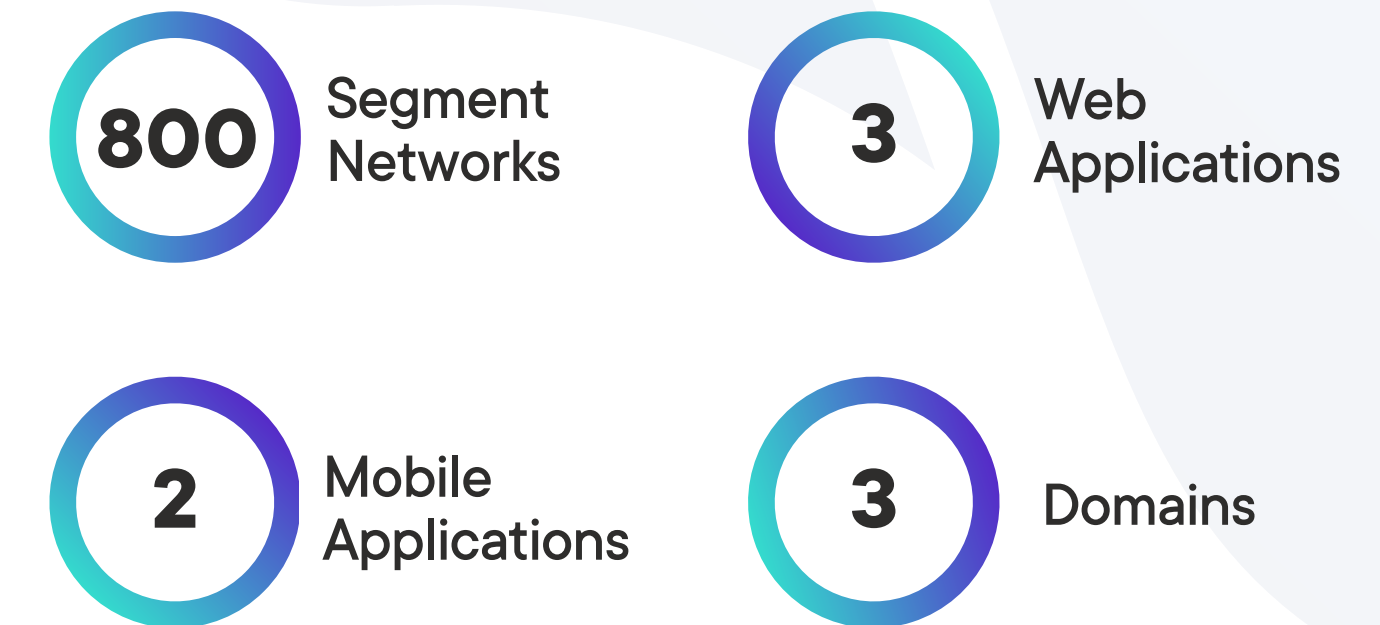

As a result, a **comprehensive penetration test report** has been delivered with the following information:

- Scope of the test, using the information provided by the customer;
- Method – a combination of **black-box and grey-box** approach;
- A **thorough analysis** of the findings, containing a risk and impact assessment according to the OWASP methodology, technical information on the vulnerabilities, remediation guidelines, etc.

**Follow-up meeting with the customer, presenting the report.**

### Results

Full-scope Red Teaming penetration test of all internal networks

Continuous penetration testing of:

- Web applications
- Mobile applications

Increased cybersecurity posture of digital assets

Improved companies' information security
